

ADITYA NARAIN

Senior Engineering Manager | Boston, MA | anarain1989@gmail.com

SUMMARY

Strategic engineering leader with over 11 years of expertise in architecting and scaling AI-driven platforms and enterprise ecosystems. Currently manage a cross-functional organization of 15+ engineers at Wayfair, overseeing the Experience Orchestration Platform (XOP)—a stateful engine driving multi-channel customer journeys—and the high-availability enterprise ticketing platform supporting thousands of global agents.

EXPERIENCE

Wayfair — Senior Software Engineering Manager | 2019 – Present | Boston, MA

Organizational Leadership

- Lead 15+ engineers across Ticketing and AI/XOP platforms; own staffing, calibration, and career growth across IC and management tracks.
- Grew multiple engineers to senior level; Spearheaded knowledge-sharing via brown bag series, defined scoping for Tech Transformation Initiatives, and formalized mentorship frameworks.
- Engineering owner for platform strategy, influencing Director-level roadmap decisions with Product, Ops, and Data Science.

AI Virtual Assistant & Experience Orchestration Platform (XOP)

- Owned the engineering strategy for an in-house AI Virtual Assistant built on Vertex AI, enabling customer self-resolution of post-order issues. Reduced Follow-On Contact Rate (FOCR) by 45%, directly lowering cost-to-serve.
- Led the implementation of Policy Management Service with Staff Engineering and Product, centralized enforcement of post-order policies across AI-driven and agent-assisted workflows, aligned with business stakeholders.
- Drove XOP platform strategy: composable workflow engine (UI + non-UI) that improved developer velocity by 60%, build time reduced from a quarter to ~15 days.
- Own RAG pipelines, LLM-powered decisioning, and automated multi-step customer experiences at production scale.

Enterprise Ticketing Platforms

- Own internal support ticketing platforms (Jira Service Management) serving thousands of agents globally across multiple business lines with 99.9%+ availability.
- Lead Jira DC → Cloud migration: designed API/webhook gateways decoupling 20+ consumers, coordinated LTS upgrades with Infra, DB, and Atlassian.
- Launched proactive monitoring autoclose (Pub/Sub, Kafka, Scribe) — reduced manual ticket ops ~30%.
- Established SLO-driven reliability culture: Datadog/Grafana observability, blameless incident reviews, production readiness standards.

Oracle Cerner — Associate Senior Software Engineer | 2014 – 2019 | Kansas City, MO

- Engineered core RevenueCycle platform components (healthcare billing); improved launch/rendering performance for systems processing millions of transactions.
- Remediated critical security vulnerabilities in production hospital systems; mentored junior engineers.

SKILLS

Languages: Java, PHP, TypeScript, React, GraphQL, REST | **Data:** Kafka, MySQL, Elasticsearch, Pub/Sub, BigQuery | **Cloud:** GCP, Vertex AI, Docker, Kubernetes, Terraform, Airflow, dbt | **Ops:** Datadog, Grafana, SLOs, incident management

Leadership: Org design, RFC culture, performance calibration, cross-functional program management, talent development

EDUCATION

M.S., Computer Science — University of Southern California (2012–2014)

B.E. (Hons.), Computer Science — BITS Pilani (2007–2011)
